

NAGAR PALIKA PARISHAD, AZAMGARH

Work planning for reduction of NRW:

1. **Automation of Tube wells:** Till date, Nagar Palika Parishad is unknown about varying discharge of its tube wells. In AMRUT Mission, under Water Supply Component, Automation of 24 Tube wells has been taken up for which DPR has been approved by SHPSC. After that we will be in position to adjudge our quantity of water supply.
2. **Arresting of leakages:** Wherever leakage is reported, it is corrected on top priority basis. Other leakage points are being detected by staff of Jalkal deptt and are being rectified then and there.
3. **Water supply House connection:** In AMRUT Mission, DPR of approx. 1500 household has been prepared and Ist installment of Rs. 10.10 lakh has been released to Nagar Palika which in turn has been released to the Working Agency, UP Jal Nigam, 2nd Construction Division, Azamgarh. If water connection will be made available legally to household, then there will definitely be reduction in NRW.
4. **Replacement of old pipelines:** In AMRUT Mission, replacement of 05km old and damaged pipelines has been taken up. Apart from this, more and more length of pipelines has been taken up by ULB for replacement, which in turn, will reduce NRW.
5. **Repair of Sluice valves:** Old and damaged sluice valves have been detected by ULB and work is going on to either change these or repair these as per requirement.
6. **Metering System:** In AMRUT, 100% metering has to be done in future, which will also reduce NRW.
